EDUCATION

University of Florida

Bachelor of Science in Computer Science

Gainesville, FL

May 2026

- **Relevant Coursework:** Data Structures/Algorithms, Software Engineering, Intro to ML, Intro to Virtual Reality, Entrepreneurship

WORK EXPERIENCE

Microsoft

Software Engineer Intern

Redmond, WA

May 2025 – Aug 2025

- Cut compliance review time by 50% and manual effort by 20 hours weekly by creating a centralized regulatory compliance framework using **SQL** and **C#** to store, track, and update 2,000+ regulation requirements across all Microsoft products
- Accelerated time-to-market for compliant solutions by up to 6 weeks by developing dashboards in **React**, **TypeScript**, and **FluentUI** for stakeholders to explore regulations, monitor implementation progress, and identify coverage gaps

Microsoft

Software Engineer Intern

Redmond, WA

May 2024 – Aug 2024

- Enabled 10,000+ developers to test and troubleshoot 50+ **Microsoft TeamsJS** APIs by building a diagnostic app with a drag-and-drop interface, real-time response display, and configurable API tests using **React**, **TypeScript**, and **FluentUI**
- Reduced troubleshooting time by 15 hours per week by designing and implementing log management features and owning the full product lifecycle from creating the product requirements document (PRD) to delivering the minimum viable product (MVP)

Microsoft

Explore Intern (Product Manager & Software Engineer)

Redmond, WA

May 2023 – Aug 2023

- Analyzed market trends and competitor strategies to shape the roadmap for a notification system, defining features and technical specifications while aligning with 10 internal and external stakeholders through biweekly product reviews
- Developed an in-app notification API using **TypeScript**, enabling developers to integrate real-time notifications into Teams, Outlook, and Microsoft 365 apps, driving 25,000+ users to return to an app within 24 hours of notification delivery

Epic Hire (Startup)

Product Manager & Design Intern

Remote

Aug 2024 – Nov 2024

- Led a 6-person team in the end-to-end design of a recruiting platform using **Apple Vision Pro** and spatial computing
- Increased recruiter efficiency in candidate-job matching by 45% by designing 5 high-fidelity **Figma** mockups that optimized the user experience for job posting and candidate management

Digital Worlds Institute Research Lab

Undergraduate Research Assistant

Gainesville, FL

Jan 2023 – June 2025

- Reached 8M+ annual users across 25 states by creating 8 educational word games in **JavaScript** and **Node.js** for students
- Authored a research paper on the impact of gamified learning on early literacy and vocabulary retention, submitted for publication in *Frontiers in Education*, to inform curriculum design in early education

LEADERSHIP

We Create Tech (Nonprofit)

Program Manager

Remote

May 2025 – Aug 2025

- Launched a 6-week Roblox game development program at a high school of 1,300+ Atlanta students, introducing underrepresented youth to technology and guiding them to code games inspired by their culture and community

Product Space

President & Product Manager Fellow

Gainesville, FL

Aug 2023 – Jan 2025

- Increased fellowship applicants by 39% and social media following by 53% in 3 months by implementing targeted marketing, partnerships, and content strategy, leading to the “New Student Organization of the Year” award

PROJECTS

LabSpec Dashboard

Jan 2026 – Apr 2026

- Built a full-stack laboratory information management system (LIMS) using **React**, **TypeScript**, **FastAPI**, **PostgreSQL**, and **Supabase** with 10+ features including barcode specimen intake, chatbot retrieval, role-based authentication, and CRUD workflows

CampusSwap

Feb 2026 – Apr 2026

- Developed a student marketplace using a LAMP stack (**PHP**, **MySQL**, **Apache**, **Linux**) with university-verified authentication for secure peer-to-peer buying and selling, and Google Maps API integration for geotagged listings

SKILLS

- **Technical:** Java, C++, Python, SQL, React, JavaScript, TypeScript, ML libraries (TensorFlow, Scikit-learn, Pandas), VR Development
- **Product & Design:** Product Strategy, Stakeholder Management, User Research, Market Analysis, Agile/Scrum, Figma, Prototyping
